Roland GS-24 - Compact, easy and productive.

The GS-24 is a user friendly, instant sign maker with a small foot print and
a big appetite for work. Compact enough to be office based, it can produce safety signs,
notices, logo's and custom messages in striking colour, in minutes.
Delivered complete with professional software, the GS-24 makes designing and producing
professional signs an everyday possibility.

Roland® CAMM-1 GS-24

With the GS-24 you can easily create all of the signs below!

Roland GS-24 - Cutting your signs and costs!

With a foot print of only 86 x 32cm, the system fits perfectly in all work environments.
Complete with a professional and easy to use design software - the GS-24 brings in-house sign making to everyone. More and more industries and institutions are discovering the cost and time savings from making signs in-house.

Comes complete with Roland CutStudio™ software!

Included Roland CutStudio software is specially-designed to harmoniously work with Roland cutters, allowing you to quickly, easily, and effectively output cut graphics, including resizing, repositioning, rotating, and mirroring images. The GS-24 also cuts oversized images using a using an improved tiling function, and cuts true type fonts without the need for outlining.

CutStudio supports BMP, JPG, STX, AI, and EPS file formats, and can cut directly from Adobe Illustrator or CorelDraw.
